Ehab Mustapha

Born in 1983 the third of February

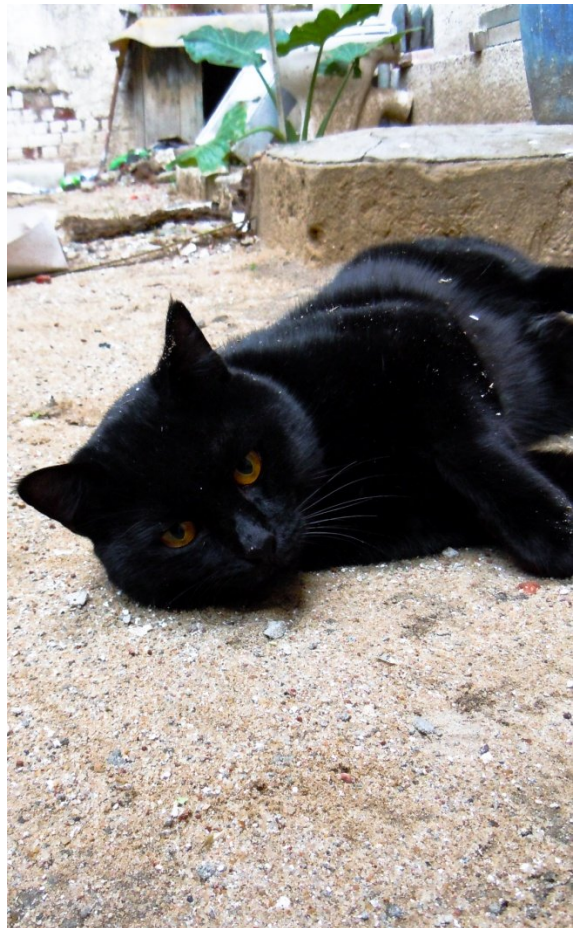

Ehab was graduated from the faculty of arts, theater studies in 2005 but his passion to photography was formed before that date. He tried different types of photo making, Analogue cameras, photo film, mobile photos and SLR.

"There is certain poetry in the image, a language that no mankind cannot understand or feel." -Ehab Mustapha

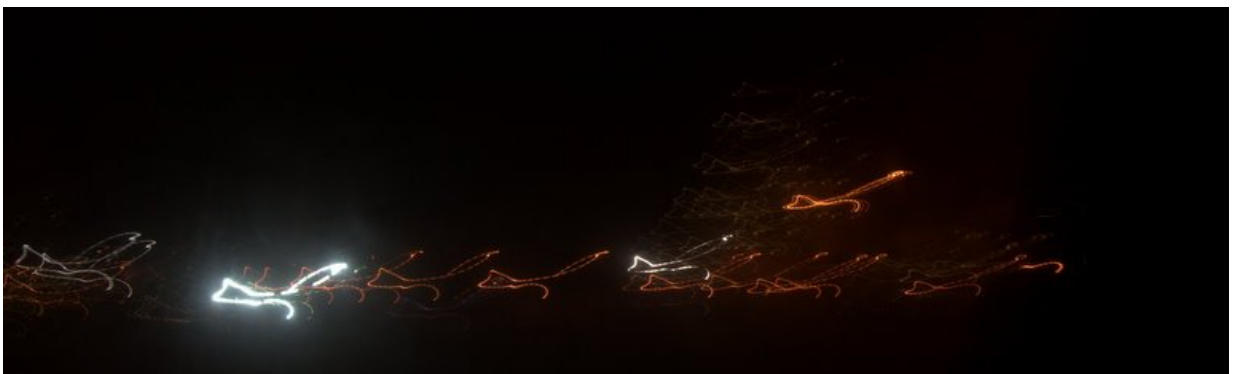

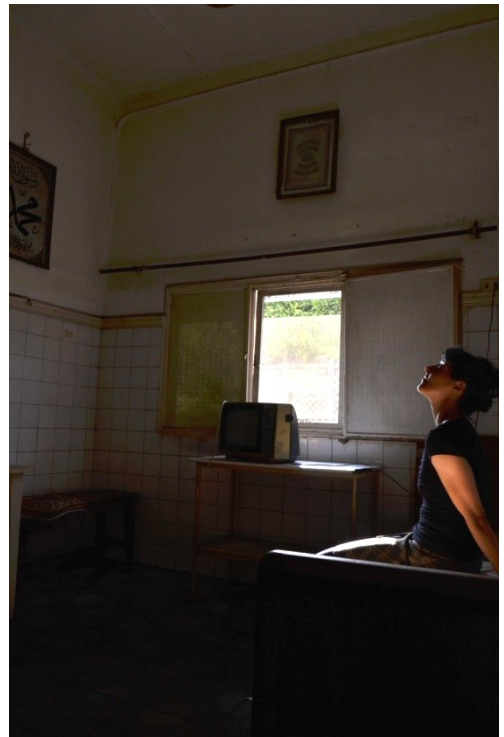

As for a fresh photographer with a good experience in visual art; the most interesting thing to Ehab is to find the topic of his photographic piece, the composition and light are the technical side of the experience. The key to a good photography is the concept and it can also be very simple and usual but it depends on how you saw it.

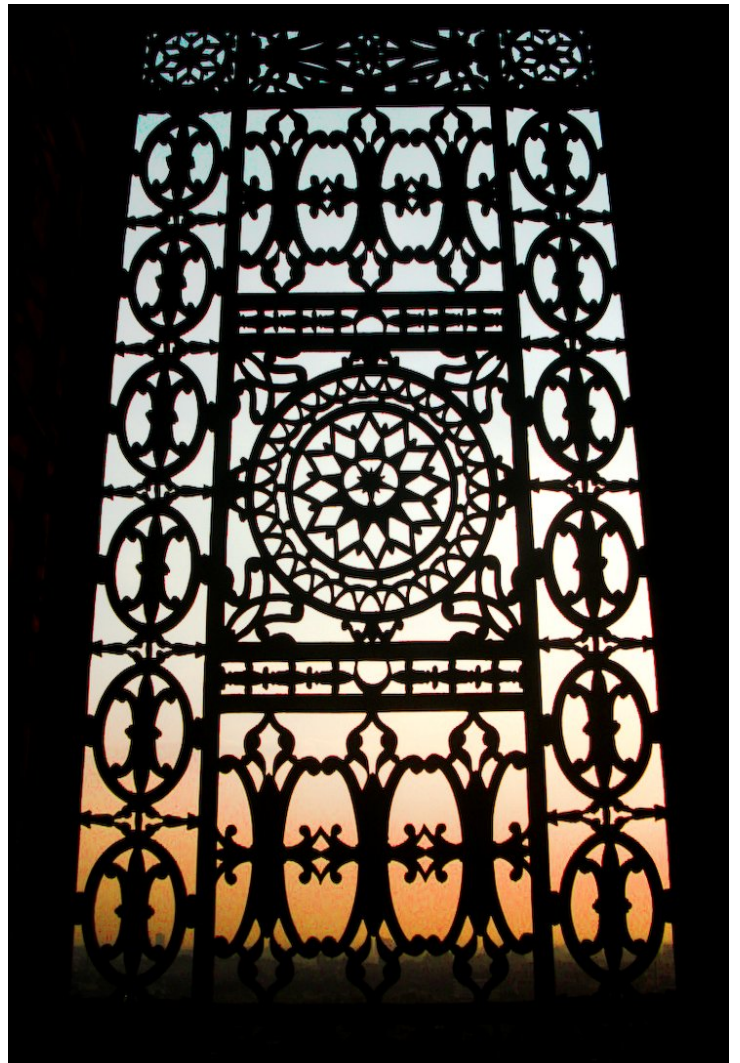

In 2008 he won his first photography award in an online photo contest, the photography was taken by a mobile phone and still could make it to the finalists. Later that date he won in more photography competitions; recently he won the third place in The Egyptian photo marathon, and the third place award in the Chinese ambassador trophy in Cairo.

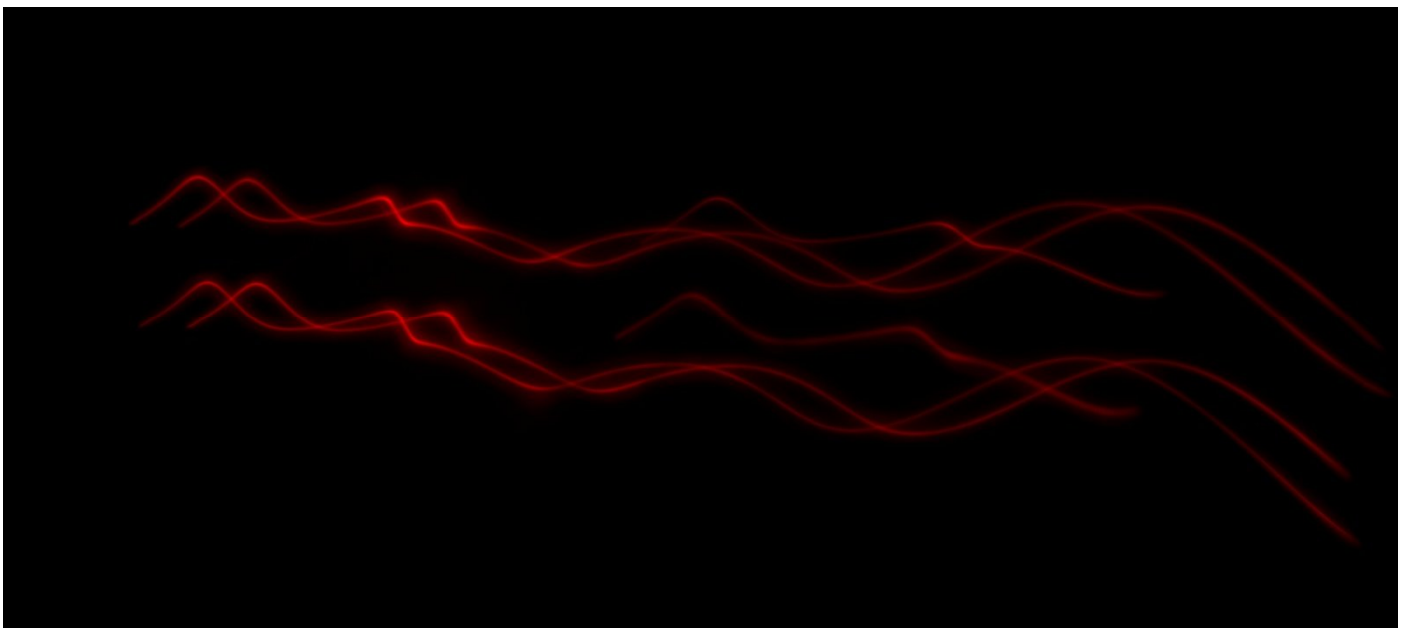

In 2009 he founded Jester© for arts and culture, which is an initiative of producing films, visual and performing arts productions. Jester has produced and co-produced two theater performances, two films and now the foundation is preparing for visual art exhibitions, *they were here* and *the photographer*.
